GitHub: www.github.com/bilalelsayed97 View

SUMMARY

A self-taught **Mobile Application Developer** with a solid engineering background, showcasing expertise in mobile app development using Flutter & Dart. Proficient in **UI design** and renowned for strong problem-solving abilities. Committed to delivering innovative and user centric solutions while continuously enhancing technical skills.

EXPERIENCE

- **Internship @ Al7osam,** *Software Engineer – Mobile application developer (Flutter)*
  8.2021-2.2022 [LINK]

- **Al7osam,** *Software Engineer – Mobile application developer (Flutter)*
  3.2022 – present [LINK]

- **Freelance,** *Software Engineer - Mobile application developer (* Flutter *)*
  8.2021 – present

SKILLS

- Cross platform development
  - Android
  - iOS
- Flutter
- Dart
- OOP
- Clean Code
- Firebase
- FCM
- Google Maps API (+Tracking)
- RESTful API (http - Dio)
- Problem solving
- CI / CD
- State management
  - Bloc
  - Cubit
  - Provider
- SQLite
- Git and GitHub
- GitHub Actions
- Design patterns
- SOLID principles
- MVVM
- Clean architecture
- Dependency Injection

PROJECTS

GitHub Repos Viewer *LINK*
Complex GitHub client app with all the **best practices** applied.

Used technologies: Flutter, Dart, Figma, **REST API**, **OAuth**, **Bloc**, **Clean Architecture**, **Design Patterns, SOLID Principles, Dependency injection**, Responsive.

- **Clean Architecture**
  - Commencing development on Repo Viewer, a sophisticated GitHub client app.
  - In-depth exploration of best practices for architecting intricate apps.
  - Initiating, covering essential aspects beyond initial expectations.
- **OAuth2 Authentication Implementation**
  - implementing OAuth2 protocol for remote server authentication.
  - Development of a robust solution for seamless sign-in to Flutter apps.

    - Ensuring secure token persistence to eliminate the need for frequent user sign-ins.
- **Paginated Data Local Cashing and UI Integration**
    - Acquiring paginated data from the server
    - Implementing local caching.
    - Displaying starred GitHub repositories of signed-in users in the app's user interface.
    - Creation of remote and local services for managing paginated data, repositories, and application layer classes.
- **Code Duplication Removal and Search Functionality**
    - Application of techniques to efficiently remove duplicated code from the codebase.
    - Abstractions without compromising the existing code.
    - Integration of a user-friendly search functionality into the Repo Viewer app for GitHub repository searches.
- **WebView Integration and Data Consolidation**
    - Incorporation of WebView to display classic HTML content, focusing on the README file of GitHub repositories.
    - proper usage of WebView and addressing prerequisites for HTML content rendering.
    - Consolidating data from multiple requests to enhance overall app performance.
- **Internationalization (i18n) and Platform-specific Plugin Development**
    - **Support Multiple Languages**
        - Enable the app to be presented in different languages, allowing users to choose their preferred language.
    - **Adapt to Cultural Differences**
        - Consider cultural nuances in date formats, number systems, and other aspects to create a more inclusive user experience.
    - **Facilitate Localization**
        - Use tools and processes that make it easy to adapt the app's content and user interface to specific languages and regions.
    - Emphasis on the necessity of app internationalization (i18n) in the global market.
    - Implementation of multi-language support (Localization).
    - Mastery of platform-specific functionality through the creation of plugins for Android, iOS, and web platforms using Dart codebase.

MicroBus *LINK*

MicroBus is a booking bus software to book and create trips.
Used technologies: Flutter, Dart, Figma, Adobe Illustrator, **REST API**, **SQLite**, **Bloc**, **MVVM**, **Google Maps API**, **Design Patterns, SOLID Principles, Dependency injection**, Responsive.

Installments Manager *LINK*

Installments Manager app allow you to create a profile for customers from contacts adding products and manage installments they took.
Used technologies: Flutter, Dart, Figma, Adobe Illustrator, **REST API**, **SQLite**, **Bloc, Firebase**, **MVVM**, **Google Maps API**, Responsive.

Favorite Places *LINK*

Favorite Places app allow you to create a profile for places you visited with camera and location.

Used technologies: Flutter, Dart, Figma, Adobe Illustrator, **REST API**, **SQLite**, **Google Maps API**, Responsive.

Chatting app *LINK*
The chatting app is a real-time messaging application that is required in most applications.
Used technologies: Flutter, Dart, **Provider, Firebase**, Responsive.

Shopping (E-commerce) *LINK*
An e-commerce application designed for both sellers and users, featuring an admin page for sellers to effortlessly add products. Meanwhile, users can populate their carts with selected items, complete purchases, access a dedicated section to track and manage orders, maintain a purchase history, cancel orders, and utilize product filters.

Used technologies: Flutter, Dart, Figma, Adobe Illustrator, **REST API**, **SQLite**, **Provider, Firebase**, **UI UX design**, Responsive.

Meals Gradients & Steps *LINK*
Meals Gradients & Steps app allows you to select a food category, choose a meal from within it, and upon selecting the meal, you'll be presented with its detailed steps and ingredients.
Used technologies: Flutter, Dart, **Provider,** Responsive.

Money Pocket *LINK*
This app allows you to input your daily expenses and provides you with a weekly expense chart. Despite its simplicity, I was able to create it successfully while my learning journey.
Used technologies: Flutter, Dart, Responsive.

EDUCATION

Tanta University, Bachelor of Engineering
09.2016 – 07.2021
Holds a B.S. degree in Projects Management from the faculty of Engineering with **A** grade in graduation project.

COURSES

- **Flutter & Dart - The Complete Guide [2023Edition],** *Udemy.*
- **Database Fundamentals,** *Information Technology Institute (ITI).*
- **GitHub Actions - The Complete Guide,** *Udemy.*

CERTIFICATES
